

Professional Security Services

I.T. Security Design & Compliance

For over 17 years, TorchLight has been a leader in information technology and information security throughout North America. Recognized by Forbes Magazine with placement on the prestigious Forbes Technology Council since 2019, we aim to create IT service and security outcomes that match not only the goals of your organization but meets the challenges of today and tomorrow.

Torchlight's security consulting services include a full suite of Audit and Assessment services to gain a better understanding of your current I.T. and I.T. Security posture. We work together to build roadmaps that ensure the future health of the business and engineers that can deliver results and performance of the plan. With additional I.T. Security testing services, we can provide compliance reporting and attestation services.

Advisory Services	Security Consulting	Engineering & Implementation
Our Advisory Services provide a clear understanding of your organization's risk and exposure to cyber attack, the level of preparedness and the impact it could have on your business.	Our Security Consulting team is committed to providing a security-first consultative service, which enables alignment of technology and business goals & outcomes.	Our team brings project management and engineers to execute on the plan to ensure delivery of the business outcomes.

Advisory Services

Virtual Chief Information Officer (vCIO)

Torchlight partners with clients to guide the short term and long term development of the Information Technology function with the business. A vCIO performs the same functions as a full time CIO, while only using a fraction of the time and leveraging our long term experience.

Virtual CISO (vCISO)

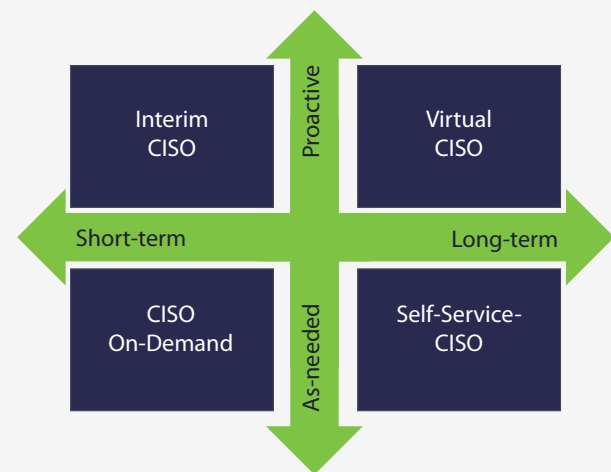

A comprehensive solution focused on information security for organizations with a higher level of complexity and compliance. A fractional cost approach delivers value and execution without the long term expense to the organization.

Interim CISO / On Demand CISO

A CISO engagement to run your security program month to month while a new CISO is recruited. On-Demand solutions provide a CISO function when required via pre-purchased block of hours the organization can utilize when required.

Self Service CISO

Access to Torchlight's diverse set of audit, assessment and compliance templates to utilize for your team.

Security Consulting

Ransomware Gap Assessment

The Ransomware Gap Assessment (RGA) identifies security objectives from the NIST Cybersecurity Framework (NISTIR 8374) that supports preventing, responding and recovering from ransomware events.

Risk Assessments

Customized assessments help clients understand potential options and strategies for managing these risk to a level that works for their business continuity. Our assessment services include HIPAA, SWIFT, GLBA, FERRPA and more.

M365 Security & Licensing Consulting

Microsoft M365 licensing and security options can be both complex and complicated. As a Microsoft Gold Certified Partner, we understand the nuances to licensing and implementation. We can review your current tenancy and recommend best practices for your implementation, and we have M365 Licensing Management and Secure Score Monitoring as part of our Managed & Secured IT Solutions.

Penetration Testing

Torchlight offers both internal and external penetration tests which are simulated cyber attacks against your entire network/websites/ domains/ to scan for exploitable vulnerabilities and security risks.

Compliance and Audits

Our certified Auditors will work with your team to evaluate the state of your organization as it relates to all areas required by either HIPAA, FFEIC, GLBA and other requirements as needed.

\$4.88M

The average cost of a data breach in 2024 is \$4.88 million. (IBM Data Breach Report 2024)

Engineering and Implementation

From small implementations to large scale projects and migrations, we are committed to developing and implementing solutions with a 'security first' approach. We are here to help guide your organization through the design, development and implementation of your security infrastructure regardless of size.

Our team has specialized experience in the management and implementation of highly complex projects. If your organization is looking to upgrade your infrastructure, consolidate an acquisition or relocate your business, we are here to guide you through the process from concept to execution.
